PROFILE

Passionate about coding and education! I'm a tech enthusiast with expertise in HTML, CSS, JavaScript, and C, and I'm currently expanding my skills with C++. In addition to my own learning journey, I enjoy sharing knowledge through tutoring. Teaching is not just a profession but a rewarding experience that allows me to empower others with valuable skills.

Beyond the world of coding, I have a fun side too – I'm a meme creator! Memes are my creative outlet, and I love making people laugh through humor and creativity. When I'm not coding or tutoring, you'll likely find me crafting the latest internet meme trends.
